

What Do We Recycle?

We offer the very best prices for all types and grades of scrap metal including copper, brass, lead, stainless steel, scrap iron, automotive batteries, aluminium, electrical cable and many more.

If you are unsure whether or not your item is recyclable just give us a call and it will almost certainly be a valuable item of scrap metal. Even everyday items such as washing machines, radiators, and central heating boilers all have a scrap value.

We offer free skips for works clearances within our local area (Rossendale, Burnley, Bury, Accrington, Blackburn). In addition we can arrange for collection throughout the whole of the North West, via our network of recognised and trusted hauliers.

We also offer a free collection service for householders within a 10 mile radius of Rossendale.

What Don't We Accept?

Please don't confuse us with landfill sites. Examples of things we don't accept include:

- Cars
- Fridges
- Televisions

If you have a fridge you want to dispose of, then your local council is your best contact point. We cannot process them due to the harmful CFC's present which require specialist disposal. Likewise, we cannot accept TV's due to the cathode ray tube, which also requires specialist disposal.

If you are at all unsure, then just give us a call on **01706 215629**, to see if you can take

advantage of the best scrap metal prices in Rossendale, Burnley, and Bury.
